# CIT 249: Java II
Chapter 37 Programming Assignment

Create a program that enables the user to set the properties of a FlowLayout manager dynamically, as shown in the following figure. The FlowLayout manager is used to place 15 components in a panel. You can set the alignment, hgap, and vgap properties of the FlowLayout dynamically. When run the program will display as:

The buttons alignment will adjust according to what is entered in the text fields and selected from the combo box. An example is:

Compress all files into a single zip or rar file and submit.
